

1.2 World Wide Web

- Tim Berners-Lee @ CERN: 80s: Hypertext-program Enquire
- 1990: World Wide Web
Basic building blocks:
 - HTTP: Hypertext Transfer Protocol
 - URL: Uniform Resource Locator
 - HTML: Hypertext Markup Language
- Break-through: with appropriate browsers (Mosaic, Marc Andreessen, begin 90s), Netscape boom 1995/96, Internet explorer delivered with MS operating systems, ...
